

THE HOLOCAUST WARS PROJECT

A BRIEF ORIENTATION PACKET

Generated By:

Project Gideon Company ("PGC")

Contents

I	The Mission.....	1
II	A Glimpse At The Founders of PGC.....	4
III	What Constitutes “The Holocaust”?	5
IV	What Constitutes a Holocaust War	9
V	What Can a Small Company Do?	11

THE MISSION

Make and use “Intellectual Products” that are insightful, respectful and suitable to cause memorial presentations – and especially the coming centennial – to be balanced for remembering the pain, the resistance and heroics of Jews and Gentiles who fought the perps who committed the worst crime in history.

Create “Intellectual Products” for targeted educational program

Launch a company – Project Gideon Company (“PGC”) to market the “Intellectual Products” which are professionally prepared and vigorously fight in intellectual wars that are likely to ensue.

On the day PGC is launched, it will have a vast array of: “Intellectual Products” which consist of: Films, manuscripts, documentaries, plays, opinion pieces, critiques and targeted educational materials – books, and lesson plans. Such products will be accompanied by suggested management and administrative instructions.

Joint Venture with companies which can provide the “Golden Touch” (Artistically) to complement PGC’s prepared books, film scripts and storylines.

As the silly commercial on TV states: “WE HAVE THE MEATS” and are searching for sandwich makers.

PGC'S Additional Objectives

Actively Advocate the generation of a “Credible Jewish Promise” to many aggrieved nations, tribes and groups that as a result of credible efforts by muscular Jewish organizations re the Holocaust and the educational values of the products generated primarily by Jewish sources, the aggrieved will have an ally in the fight against the demented Totalitarian cults – the Midwives of Atrocities.

“NEVER AGAIN” will have to “Go International.”

Advocacy alone will not do. Neither did the Chechen terrorist attacks in Russia suffice to deter the Russian atrocities in Chechenia, committed by Russia not very long ago. Not much helped the aggrieved by the pretentious United Nations' outfits. They couldn't indict Milosevich in three years at the world court. It is way outside PGC's competence to precisely suggest how this Jewish promise could be actualized. However, PGC believes that “We” – all Jews – owe the honorable people who risked life to help Jews in dire straits (and, in many instances, risked the lives of family and friends) a reasonable effort. Israel issued medals to heroes; we should offer reasonable effort for the aggrieved.

Once and For All, destroy the myth that any Tom, Dick and Harry can kick the Jews at will. Although much easier said than done, it is possible to issue credible threats and deliver.

Remember: Eichmann and others were killed, Munich Olympics killers of Israeli athletes were killed, Idi Amin's Air Force was decimated. All nuclear developments in some countries were eliminated. Numerous terrorists don't sleep in the same bed for two nights in a row, and don't forget that you don't know the hundreds of cases of revenge extracted.

A GLIMPSE AT THE FOUNDERS OF PGC

- Jacob Sternberg (“JS”)
 - Certified Holocaust Survivor
 - Former Israeli Paratroop Officer
 - Former Professor (Engineering, NYU-Poly)
Inventor, CEO of High-Tech Companies

- Christina Sternberg (“CTS”)
 - The daughter of a German world-class aerodynamics technologist
 - A granddaughter of “Privileged Jew” who died at Theresienstadt Concentration Camp.
 - An Accomplished Information Scientist
 - Professional Career Spans:
 - GE’s Hanford Atomic
 - GE’s Nuclear Research at Knolls Atomic
 - CBS and Shell (Research)
 - JS High-Tech Companies (Research)

- Jacob Gostl (“JG”)
 - A son of Holocaust survivors both of whom had lifelong PTSD
 - An Accomplished Information Technologist
 - An Instructor of Computer Science at NYU
 - Founder of Several High-Tech Companies
 - TransVirtual Systems – Produced hardware and software to virtualize legacy hardware
 - Trusted Data Solutions – Performed large scale tape restorations and conversions
 - ARGOS Computer Systems – Voice response, communications front ends, financial service products
 - Large Communications Systems
 - American Express
 - ADP
 - Prudential Financial
 - And more
 - Currently President and CEO of Argos Systems
 - Former CEO of Trusted Data Solutions

All Three Have Real “Close and Personal” Interest in the Holocaust

WHAT CONSTITUTES “THE HOLOCAUST”?

First Comes Harnessing the Facts: “What/How/Why did it Happen”?

By examining these facts, we drew the following conclusions re:
The Holocaust.

It is the worst crime in history by virtue of What Was Done to the
Jews

It is the Worst Crime in History by virtue of How it was Done to
Jews, Slave Laborers, Roma People, Homosexual and
other Nazi-classified subhumans

It is an INEXPLICABLE CRIME by virtue of Why it was Done.

The World Largest Research Project Ever, now lasting 77 years,
is still going strong. It involves hundreds of stellar institutions –
governmental, academic, social, endowed private and political
societies – employing stellar/competent/stubborn researchers.
In aggregate, near infinite data was assembled, organized and
mined to extract “information” (data with meaning attached) and
then, extensively mined to attain intelligence (actionable
objectives attached to information) nothing short of “incredible”
should be attached to this project.

**With all the above said and meant, we find the answers provided
so far incomplete.**

PGC’s Founders have extended much effort, for two decades
prior to incorporation, to deal with focusing on the meaning of
“The Holocaust.” The following provides a hint of PGC’s
“Displeasure.” A much more thorough treatment is provided in
the Knowledge Base entries.

PGC’s extended effort includes examining the psychiatric and
eugenics cartels’ contribution, the appeasers’ roles and the ripe
conditions in the European sewer for three major wars, and a
depression thrown in the mix, to create the background for a ripe
Holocaust.

“Polite attack on the seeming Consensus View of the Holocaust”

CONSENSUS

A set of events (1939-1945) resulting in the killing of Six Million European Jews in World War II

ALTERNATIVE

A singular, final event in a very long sequence of Atrocities (2000 years) against the Jews in Europe and Asia.

HOLOCAUSTS DON'T JUST HAPPEN. THEY FOLLOW ATROCITIES/GENOCIDES

The killing of Jews occurred in conjunction with atrocities/genocides against Roma people, homosexuals, mentally disturbed and others they considered disabled.
Brutal slave labor practices against non-Aryans resulted in massive, barbaric practices.

The “Killing” of Jews turned to “Extermination” (Accompanied invariably with pain and suffering)

As brutal and barbaric as the Nazis were, only the Jews were targeted as a Fourth Battle Front – with “Industrial Strength” extermination methods, vast logistics, expensive plans, massive propaganda, massive detailed administration.
All Encapsulated in a Massive Legal Frame.

Even a cursory examination indicates that a talented military, a productive/talented industrial base, a generally cultured populace has marched in lockstep with one mustached idiot.

The fundamental justification for the “Final Solution” atrocity justified killing of Jews since they existentially threaten the purity of the Aryan blood which threatens the Reich’s existence.

The demented/flimsy excuse for the worst crime in history is extremely suspect. Hence, the necessary search for additional pillars to support the singular Holocaust crimes takes priority

PGC's Suggested ("Less Consensus") View of "The Holocaust" (A Draft ...)

"The Holocaust is the Final Set of Events in a long, 2000-year sequence of pogroms, atrocities and genocides directed specifically at Jews in Asia, North Africa and Europe.

Being directed at Jews as a "Race," it culminated in the extermination of six million European Jews in regions ruled by Germany in World War II ("WWII"), primarily between year-end 1941 and mid-1945.

It is a singular event, which unlike any other massive killing event, involved enormous allocations of resources in a multi-front war, meticulous planning due to significant shortages of fuel and raw materials, shortage of manpower and required continental size handling of difficult logistics.

It was, worst of all, executed by a cult, stubbornly clinging to a near-theological belief's flimsy excuse for unprecedented hatred, utmost humiliation and maximum pain accompanying exterminations.

In its wake, it left a seriously disoriented Jewish survivor population (in the millions), a vast number of non-Jewish people of honor who couldn't grasp a country gone berserk, a strange and sick admiration for the Holocaust implementor's detailed orderliness (ya, ordnung ...), paving the way for a smart imitator who "cloaked" subjugation of peoples with Totalitarian/Utopian 'Kool Aid.'" Subjugation dictators, although like Stalin and Mao, are responsible for tens of millions of dead, they missed the "Holocaust" designation even though their foul deeds lasted for 46 long years (1945-1991) for the Soviets and, these days, continued by China.

There is much that can be added – we leave it to phenomenally equipped major institutions.

We cling to the above as a minimum because we wish to highlight that:

- The number of dead Jews far exceeds 6,000,000 if the past "comes marchin in." The damage to three generations of Jews is huge and cannot be easily estimated. The refuse is still smelly in the European sewer AND, the appeasers still are eager for Iran to have the bomb and really get Armageddon going. The sheriff that guarded the Europeans' bacon for the whole century is now tired.

- **To make the above assertions stick**, PGC has generated research papers that deal with further suggestions we have as provided below.

A Peek at a Malignant Mindset

- **No other set of events has involved the enormous price tag attached to the extermination of Jews** – of all the fronts of WWII It is a demented choice in the face of severe manpower, materials (e.g., steel, chemicals) **and (yes) fuel shortages.** – West Europe “Clean Up.” East Europe/Russian front and North Africa – the perps picked the war on Jews as a major undertaking, as the fourth front.
- No other set of events illustrates, better than the following example, the malignant/demented mindset of the “perps”:

“British troops were advancing on Neuengamme [a labor camp in Northern Germany]. Hitler has committed suicide a few days earlier, SS Chief Heinrich Himmler has given orders not to surrender the camps with their prisoners.

Guards put 8,000 inmates onto two ships, the Cap Arcona and the Thielbeck. On May 3, a British Air Force squadron, **knowing nothing about the ships’ cargo, bombed and sank them**” – The El Paso Times “Retracing a Lost Life 12/18/2006.”

The Nazis knew that the German warships will be sunk. And imagine: the camp commanders even violated SS Commander’s orders.

- The same deranged mindset was in full bloom when the vaunted industrial sector (e.g., I.G. Farben Conglomerate) has embraced a joint venture with the SS to employ slave labor to serve their multi-front war. **The demented/malignant idea that emaciated/sick/tortured and humiliated laborers could produce adequate war products** was only exceeded by the sicker idea that dead or incapacitated laborers can be replaced and retained in a

continuous huge logistical effort competing for resources with military necessities.

What Constitutes a Holocaust War

The First and Most Obvious “Holocaust War.”

It constitutes an “Intellectual War,” that must be won – it concerns the meaning of the term “The Holocaust.”

The Second and Very Obvious War re The Centennial

It is another “Intellectual War” involving multiple Jewish organizations who will (most likely) be at each other’s throats. These are serious kerfuffles among muscular organizations with experience in the turf fighting, strong views, significant budgets and experienced lobbying.

The excuse for this fighting will involve “What will the Centennial Seminal Memorial event consist of.

PGC has prepared extensive suggestions for “Waffenstillstand” (“Truce”) among Left/Right, secular/religious, Israel affinity differences, because it is a Seminal Event. There is a major source of potential problems involving nations (e.g., Poland, Lithuania, Hungary and, of course, Germany wanting “A Get Out of Jail” card – which we explain at length.

The Third and Obvious War re The Holocaust

It is another “Intellectual War” involving an International Patina – like a non-event – which PGC believes is a disastrous idea for reasons we make great effort to explain in our opinion papers.

Remember the Chinese “Year of the Woman” celebration In China, a country that kills female babies because they will be women!

A major category of a “Holocaust War” consist of potential physical warfare.

- The Middle East does not possess any saintly members.
 - Iran may shortly acquire the bomb
 - Once this happens, resource-rich, even smallish countries, will also acquire bombs, because it is cheaper to buy than to research and make bombs.
 - The “Asylum State” of North Korea and the Armageddon Wishing Iran can easily become a “Nuclear Bazaar.”
 - Israel may have no choice but to take Iran out of nuclear business
 - The Middle East has had insane wars since WWI.
 - **PGC is not capable of doing anything about physical wars in the Middle East. The sole contribution it can make at this time** is to aggressively convince the Jewish organizations that claim “Tough Love” for Israel (and thus participating in the “Apartheid State” blood libel and its offspring the “BDS” movement) to join a wide array of people and countries who will make it impossible for Iran to attain a bomb.
 - **The existence of Israel cannot be bargained away and knuckleheads need to be shamed 24/7.**
- A ray of hope begins to penetrate the MidEast, more Arab League countries wish to join a brilliant Abraham Accord which now provides the U.S., former stellar sheriff, to affect, again, the reigning in the “Bad-Ass” tombstone region.

What Can a Small Company Do?

When a small company, especially a startup, presents a very ambitious project, it is usually quite alright to question the small outfits chutzpa, brains and talent. PGC may prove, and it must do so, that the scope, depth and scale of its project has a chance of making it happen. One of the Author's books, part of PGC's Knowledge Base, deals with these problems in some detail.

In this Orientation Packet, we use a short true story about giants and dwarfs. The dwarf actually wins. Not all, but some.

To undertake the explanation task, JS has developed a strong urge to tell a true brief story about three companies: IBM, American Express ("Two Giants") and Conversational Systems Corp ("CSC," "The Dwarf") who combined to tackle a nasty problem.

- 45 years ago, AMEX approached IBM to solve a nasty communications problem. In those "very olden days," paying with the AMEX card required authorization by AMEX. In mid-year, AMEX discovered that the communication load increase will cause AMEX a lot of problems, and Christmas was looming (starts by October). To top it off, IBM had a stellar reputation in their superior customer support. When confronted with the communication problem, they couldn't guaranty a solution in time. It wasn't the lack of knowhow; it was simply a huge workload and a liability. CSC had IBM Series/1 minicomputers (pre announcement, we were "trusted." Remember, the good old days ...).

A senior IBM executive suggested to AMEX's senior exec to fly into New York and meet "This crazy little company" and they might help solve the issues. All three of us knew that IBM has at least 10 people each with qualifications at least as "legendary" as ours.

I told these VIPs that it was mission impossible. At that time, Jack was No. 2 to my being CEO. I laughed when Jack came in with a solution. By using IBM's new and great communications capable machine and a work ethic that refused to accept failure, a team at CSC solved the problem.

Wait a minute, this is not the end of the story. At 3 a.m. in late September, a network node in Phoenix, one of three, experienced a computer falling off a truck. Boards were spread out on the asphalt. Jack and team hammered the chassis, inserted the boards and it all worked. It still isn't the end of the story. We, at CSC, have never learned how to charge. Our knowledge base includes this past historic deficiency in a business book that JS wrote. You may want to read the business book. The details are interesting.

Good news, we think we now grasp things differently.

You see, "The past is a foreign country. They did things differently there."
(Hartley, British Writer)

The AMEX story is not the only one that points out that big companies have sets of problems that little ones either ignore, laugh off or just solve.

PGC fully grasps that large governmental institutions have political issues to deal with, large academic institutions have donors' impact to consider on top of built-in cultural biases (Kissinger told us that Harvard faculty meetings were tumultuous because the "stakes were so low")

We close this story detour with a lesson we learned from tackling big issues.

We keep repeating it to ourselves:

It is exactly when enormous data volumes vastly overwhelm you and confusing uncertainties raise their ugly head, that it is exactly the time to put on the tight shoes. They hurt much, but they focus you to concentrate on the happy moment that you can take the shoes off after concentrating on some (even tiny) victory and ignoring irrelevant factoids. Please note that JS intends to follow this awful suggestion. He also ran a Tel Aviv marathon (in 1986) with a sprain, a well-swollen ankle. His runner number was 100.

He finished the run in 4:01 hours and enjoyed taking the tight shoes off.

There is no secret in how you do it.

You worry so much about how you make each step that you forget to watch the signs telling you how much you have already covered in distance. The first he realized the importance of this idea was at mile 24 of this race. And "2 miles to go" became a cinch.

See the Odyssey's Appendix for documentation.
